EXHIBIT 8-3

EROSION CONTROL & STORMWATER POLLUTION PREVENTION PLAN CHECK LIST

An erosion control plan is required for all grading of 1 acre or more or 500 cubic yards or more and any grading within or adjacent to a watercourse defined as a major facility during the months of June, July, August or September. The plan shall provide for erosion control and safe passage of the 100-year 6-hour design storm runoff during the construction phase.

Instructions - Fill out all that is applicable and relevant, submit this checklist with the Erosion Control Plan and or the Grading and Drainage Plan

from the site onto adjacent property or public right-of-way. This should be achieved by wetting the soil to protect it from wind erosion and by installation of berms per detail this sheet.

b. At all time, but especially during the months of June, July, August or September, any grading within or adjacent to a watercourse defined as a major facility shall provide for erosion control and safe passage of the 100-yr. 6-hour design storm runoff during the construction phase.

c. Contractor shall conform to all City, County, State and Federal dust control requirements and is responsible for preparing and obtaining all necessary applications and approvals.

d. All graded areas which do not receive a final surface treatment will be revegetated in accordance with New Mexico APWA Standard Specification 1012 and the Landscape Specifications.

e. Contractor shall obtain and abide by a Topsoil Disturbance Permit from the local jurisdiction. The cost for required construction dust and erosion control measures are incidental to construction.

PHASED DEVELOPMENT

1. Grading Plan with limits of soil disturbance outlined for each phase of development and numbered in sequential order of events.

2. Erosion protection indicated for each phase.

3. Supporting data, calculation, references and detail drain to scale or adequately dimensioned.
CONSTRUCTION AND PERMANENT PHASE

1. Grading Plan with limit of soil disturbance outlined.
