KEEP TRASH AND DEBRIS OUT OF ARROYOS

Arroyos are great places to ride bikes, walk your dog or take a stroll with the family.
Most of the time they are safe, but when storms hit, arroyos can flood quickly and be very dangerous.
Here are some things to know so you can have fun and stay safe when you're outdoors in and around arroyos:

2 LARGE ITEMS tossed out on the mesa can be swept into flooding arroyos and slam into unsuspecting folks and do serious harm.

1 EVEN SMALL rocks and branches can become dangerous projectiles when caught up in flooding arroyos.

3 DEBRIS LEFT in and around arroyos can block moving water, keep it from flowing and cause flooding and damage to nearby neighborhoods and communities.

If you see storm clouds in the western sky, it's safest to pack up and leave.
