Unit Price Bid:

As a condition of the bid, each bidder must respond to all lines in both of the cost tables provided. Partial bids will not be accepted.

Bidder shall fill out Unit Prices and Extended Cost items on both tables. In the event of a conflict, Unit Prices shall govern.

(Cost tables on next two pages)

CY= Cubic Yard

HR=Hour

¹Volumes of earthwork for each task will be determined either by surveyed quantities or by mutual agreement between the owner and the contractor prior to issuance of a task order

²This is an estimate of the number of hours of trucking for all work orders issued during the contract year

³ Submittal of materials to be used required prior to installation. Installation per APWA 603.

⁴This estimated quantity is not a guarantee of quantities to be ordered by the Owner but rather is for bidding purposes to apply a scale to the potential size of the project(s)

⁵ This scope of work does not include fine grading

For estimating quantities by truck load, a tandem truck will be considered to have a volume of 13 CY/truck load and an end-dump will be considered to have a volume of 20 CY/truck load. This methodology may be used in emergency situations to quantify amount of material removed from areas.

Table 2 - Cost Table – Emergency work schedule (nights, weekends, holidays) with 24-hour notice to mobilize to site. Maximum duration of Emergency work will be 14 days. Work persisting after 14 days will revert to standard work cost schedule. ⁵
