Please RSVP to [csalazar@sscafca.com](mailto:csalazar@sscafca.com) by December 2<sup>nd</sup>, 2022.

For questions, please call (505) 892-7246

This meeting provides an opportunity for the membership to hear from local water and flood control organizations about the years activities and accomplishments.

The Middle Rio Grande Flood Control Association was created in 1947 as an organization of businesses and individuals interested in and supportive of responsible flood control in the Middle Rio Grande Valley. In its early days, the association actively promoted and supported major flood control programs of the federal agencies, especially the dams and levees on the Rio Grande. Later, the association supported state and local efforts, resulting in the formation of such agencies as AMAFCA and SSCAFCA, as well as the construction of local flood control projects.
